Enter: The Nurse Visit

Workforce projections in Oregon estimate "a 38% increase in additional primary care providers by 2030 to maintain the current rate of utilization" (Petterson, 2013). However, high-functioning teams that utilize registered nurses (RNs) to manage some conditions can help narrow this gap. Enter: the Nurse Visit.

About Us

Thank you for subscribing to the Patient-Centered Primary Care Institute newsletter. The Institute accelerates primary care transformation in Oregon by bringing together health care providers, clinic staff, technical experts, patients, quality improvement professionals and others to share valuable knowledge and resources. To learn more about our work, visit pcpci.org.

The Institute is continually gathering valuable resources, tools and information to share with practices in all stages of patient-centered primary care home transformation. Find many other resources searchable by topic area, resource type or PCPCH standard [on our website>>>](#)

The Institute is a multi-stakeholder initiative managed by the Oregon Health Care Quality Corporation. For more information visit [Q Corp's website](#).
